

## European Defence Fund: Our value proposition.

### Consortium alignment on the solution.

Manage trade-off to strengthen development logic, to ease alignment of partner contributions with end-user needs, minimize friction in consortium management.

Deploy streamlined knowledge-sharing practices and tools to improve collaboration and decision-making.

### Market Driven solution.

Ensure practical outcomes by defining use cases and system specifications aligned with market needs.

Support user adoption and market readiness through effective business case development and change management.

### Complex Problem solving.

Develop hybrid models that integrate data science with Multiphysics simulations for complex system analysis.

Leverage AI, predictive analytics, data science and perform multi-factor optimization to solve complex problems and enhance decision making.

With a proven track record in **R&D collaborative projects** in particular as WP leader, our priority is to **facilitate seamless collaboration, ensure market readiness, and enable the integration of complex systems**, supported by 30 years of expertise in refining tools and methodologies.

**Mews Labs**, our “Digital Innovation Lab for industry” also helps our industrial clients to **solve complex problems** and implement **efficient and innovative solutions**.

Let's talk about your projects.
